CCSA Training – Now Available!!

The need for secure network functions has globally increased the requirement of trained network security professionals. Confidential information of numerous companies and organizations remain at stake of being hacked or misused for various malicious reasons by individuals or industry rivals. For security purposes network security professionals with knowledge of multi-vendor security technologies are hired as compared to the non-knowledgeable ones. Firewalls are devices which are used for securing networks and are company specific that is many companies build their own firewalls which requires certain amount of training before it can be used for securing one's network and its activities. Similarly Check Point Software Technologies have their

own set of firewalls which requires candidates to obtain certain amount of training before being able to work with Checkpoint firewalls. Candidates wanting to make their career in Network Security should go for CCSA course training from some reputed institute.

What NB offers?

Network Bulls offers CCSA course training to international students providing them with theoretical and practical knowledge of the course. Our CCSA training program has specially been designed for our international candidates looking for exceptional CCNA course training in Nigeria, US, UK, Malaysia, Singapore, Angola, Algeria, etc. The CCSA course content as per Checkpoint's blueprint consists deep insights about skills required while designing, implementing, maintaining, and troubleshooting network security solutions using Cisco's ASA (Adaptive Security Appliance) technologies. Cisco ASAs are used by numerous well known service providers or enterprises universally. The Firewall Specialist certification will teach aspirants how to configure advanced Cisco firewalls and VPN (Virtual Private Network), access control, advanced application inspection and controls, IP Security remote access VPN, clientless Secure Sockets Layer (SSL) remote access VPN, Cisco Any Connect full-tunnel SSL remote-access VPN, IPsec site-to-site VPNs, high availability, and other failover features.

Apart from training on CCSA course we also offer CCSA bootcamp services to our international candidates only, details of which can be found on www.international.networkbulls.com for enquires you can call us at: +91 9560148410, +91- 9560148409 or drop us an email at admin@networkbulls.com
